

The Genesis Servo-Sub™ 2/12t is a unique subwoofer that is universally installer friendly. It delivers prodigious output capability with unparalleled delicacy and articulation in an enclosure with a unique shape that allows it to be located at a sidewall, rear-wall or even in a corner.

Its form factor makes the S2/12t an ideal partner for surround or rear speakers in either home theater or multi-channel music applications. With low frequency capability down to 16Hz, the S2/12t is able to distribute bass around the room as part of a multi-channel system.

The Genesis LFE Blend™ technology allows the S2/12t to be used **both** to augment the low-frequencies of the surround or rear speakers, as well as to perform as a subwoofer for the LFE channel of a multi-channel music or home theater sound system.

A buffered daisy-chain output allows an easy way to link to other subwoofers multi-subwoofer installations. The S2/12t fits perfectly into the corners of rooms. When placed in this manner, it will excite every mode in the room at its operating frequencies. This will give the best, tightest, smoothest, and most impactful bass in well-designed rooms. When placed against the sidewall, the unique shape allows the woofers to fire forwards at a 135 degree angle.

The S2/12t features two 12-inch ribbed aluminum cone woofers and a built-in 500W servo-controlled Class-D discrete MOSFET bass amplifier that provides extraordinary control and thermal stability even when playing the most demanding sources at high volume.

**Genesis Advanced Technologies Servo-Sub™ 2/12t**

Frequency Response	16Hz to 140Hz, ± 3dB
Amplifier Power Rating	500 watts RMS
LF Transducers	Two 12" Aluminum ribbed cone
Controls	Low Pass, Bass Gain, LFE Gain, Phase Invert
Inputs	High-level with 5-way binding posts Preamp level unbalanced RCA and balanced XLR LFE unbalanced RCA and balanced XLR
Input Impedance	33K ohms
Outputs	LFE daisy-chain unbalanced RCA and balanced XLR
Dimensions	H 21" x W 31" x D 16" H 533mm x W 787mm x D 406mm
Weight	67.5 lbs (31 kg)
Finish	Satin Black
