

The mainstay of the Genesis 6-Series is the G6.1 – a loudspeaker that is stylish and beautiful, and yet awesome in its capabilities. It has won accolades for design and engineering from the Consumer Electronics Association of America, for style from Architectural Digest magazine, and for sound and performance from the Stereophile Guide to Home Theater and The Perfect Vision.

Designed to stand-alone as a high-end stereo pair, or as a component of a state-of-the-art home theater system with matching center and surround modules in the 6-Series, the G6.1 will bring you exceptional sound quality in an elegant and functional package. This is what we mean by *absolute fidelity™* (with style).

Subtle angles and curves are used to make the speaker appear smaller than it actually is. Rare and beautiful natural wood veneers are used for the front baffle, counter-pointed by a lighter maple finish on the sides.

Optionally, deep lustrous automotive finishes in contrasting colors are available for contemporary interiors.

Unique among high-end stereo loudspeakers, the G6.1 is also designed for use in home theater systems. It incorporated a unique input for the low-frequency effects (LFE) output found on all quality home theater processors that is seamlessly mixed with the normal bass signal.

Importantly, the LFE input is available on all G6.1 home theater channels (some systems would use up to 7 separate full frequency channels, or more, as specified by Dolby Digital™ and DTS™), which dramatically reduces room bass mode problems by providing multiple sources for the bass. This results in smoother bass integration and a huge system impact capability. Each speaker also has a buffered LFE output so that the LFE signal can be daisy-chained to the bass section of each other channel as needed.

The G6.1 is an audiophile loudspeaker that is also an object of beauty that will fit into the décor of any home.

### Genesis Advanced Technologies 6.1 Main Loudspeaker

Frequency Response	16Hz to 36kHz, ± 3dB
Sensitivity	90 dB 1 watt 1 meter
Max/Min Tube Power	500/75 watts
Max/Min Solid State Power	1000/100 watts
Input Impedance	4 ohms (nominal)
HF Transducers	Two Genesis 1" circular ribbon (front & rear)
Midrange Transducer	One Genesis 5" titanium cone
Mid-bass Couplers	Two Genesis 6.5" aluminum cone
LF Transducers	Two Genesis 12" ribbed-aluminum cone
Inputs	Speaker level 5-way binding posts Preamp level unbalanced RCA and balanced XLR LFE unbalanced RCA and balanced XLR
Outputs	Buffered LFE unbalanced RCA and balanced XLR
Controls	Tweeter level (±1dB), Midrange level (± 0.75dB) Low Pass Crossover Freq, Bass Gain, LFE Gain
LF Amplifier Power Rating	500W
Dimensions	H 60" x W 17" x D 20" H 1524mm x W 432mm x D 508mm
Weight	136 lbs (61.8 kg)
Finish Options	Maple body with Cebuano Rosewood shield (Standard Finish) Maple body with Olive Burl shield (Premium Finish) Arctic Silver body with Slate Grey shield (Standard Automotive)
